U.S. Patent and Trademark Office PTOL-303 (Rev. 08-06)

Continuation Sheet (PTO-303)

Continuation of 3. NOTE:

The proposed amendments raise new isssue that would require further search and consideration:

As noted by the Applicant, (at page 7 of the remarks) the amendments to independent claims 1 and 13 are similar to limitations found in claims 7 and 19. Although the amendments are similar to limitations found in claims 7 and 19, they are not the same and, therefore, would require further search and consideration. Furthermore, the amendment does not place claims 7 and 19 into independent form as would be necessary to incorporate the limitations of claims 7 and 19 into an independent claim without requiring further search and consideration of dependent claims.

The amendment does not simply the issues for appeal by raising the following issues:

- 1) U.S.C. 112, 2nd paragraph, indefinitness regarding claim 1 amendment of "occupied" to "associated"
- 2) U.S.C. 112, 2nd paragraph, antecedent basis regarding:
- a) claim 1 and claim 13 amendments of "the weighted instruction count for the thread" (a plurality of threads are previously mentioned and, therefore, "the thread" is unclear)
 - b) claim 2 amendment of "an instruction" to "the instruction"

Continuation of 11. does NOT place the application in condition for allowance because:

In response to Applicant's argument that the constant Cn is not the same thing as cycle counts, the Examiner notes that the Applicant appears to be reading the limitation "cycle counts" too narrowly. The limation "cycle counts" has not been explicitly and deliberately defined within the specification. Absent an explicit and deliberate definition within the specification, the Examiner is entitled to give "cycle counts" its broadest reasonable interpretation. The constants Cn of Emer are constants that are used to determine weighted thread counts for a particular cycle and, therefore, are cycle counts as claimed.
